

# Eric Russo

FRONTEND  
DEVELOPER

## ABOUT

A very passionate frontend developer, eager to learn at every moment. ReactJs has greatly helped me expedite my projects, and I've also delved into learning backend development. I'm looking to collaborate with teams, learning about collaboration, project structuring, online project marketing, and acquiring knowledge of new technologies.

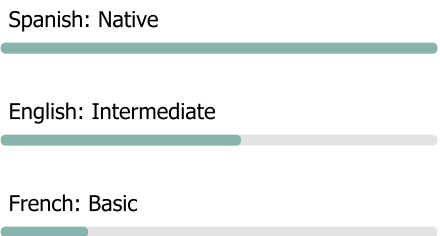

## SKILLS

- HTML5
- CSS3
- JavaScript
- React 18
- Bootstrap 5
- MongoDB
- NodeJs
- Express

## SOFTWARE

- Photoshop
- Git Hub
- Blender

## LANGUAGES

## CONTACT

-  [ericrusso@ericrussoweb.com](mailto:ericrusso@ericrussoweb.com)
-  City: Buenos Aires
-  <https://ericrussoweb.com/>

## EXPERIENCE & PROJECTS

- Projects

2023- Current

  - [SelectColor](#): A React-based game where you have to select the color of the word before time runs out. When you guess correctly, you earn points and more time.
  - [ToDoList App](#): FullStack application built with React 18, Express, Bootstrap 5, and MongoDB. Users can register, create, modify, and delete their tasks using CRUD operations to manipulate data entries and exits in the database.
  - [Online Games API](#): A multiplayer video game library built with React, utilizing the FreeToGame API and the React Router routing library to navigate through various sections and categories of the website.
  - [Weather App](#): Application built with vanilla JavaScript using the OpenWeather API. Users can access the current weather conditions for any location in the world.
- Banco Supervielle

Internship | January-April 2019 - 4 Months

  - Customer Support
  - Sale of products
  - Fingerprints registration
  - Use of softwares related with banking entity(AS400,Bantotal)
